

## CONTROL SOLUTIONS

User Friendly HMI interface  
UL Listed controls  
Remote Service capable  
iPad/Android Compatible

## CONTROL SOLUTIONS

Panel enclosures will have a color interface(HMI), which will provide the means of viewing and adjusting all system parameters. In addition to this, the fluid sequencer can also be intergrated with the system selected. Conveyor, fan speeds and temperature controls will accessible from here as well. Pre-heater, Short Wave and Medium wave I.R. intensities are controlled from here as well as actual feed back. Remote Access via wifi, will reduce down time and give the ability remote troubleshooting capabilities if necessary. iPad/Android compatibility is also available giving you access to production numbers, limited controls and error codes.

Proudly Canadian. North American driven.
